Sending a link to the Utah data as well. I don't have a contact person there.

Subject: contact information for agencies evaluating water quality data from Gold King Mine release

Michael and Jason: Thank you for the call just now regarding sharing information
regarding the Gold King mine release. Here is the list of folks I know of that are
evaluating data. I am glad to hear that Arizona Geologic Survey has a wealth of USGS
and other data.   I agree that it would be a great idea for us to all share information that
may help in interpretation of the current situation. The validated EPA data is on the
Gold King Mine web site, although it doesn't show up on the interactive map. We are
working on that:

USEPA: Harry Allen allen.harryl@epa.gov

Navajo EPA: Steve Austin nnepawq@frontiernet.net

ADEQ: Jason Sutter JS9@AZDEQ.gov

AZGS: Michael Conway@AZGS.AZ.GOV

Or you can reply to all if you would like to transmit data. Thank you!

Clancy Tenley
